OBJECTIVE

Passionate Full-Stack Developer and AI/ML Engineer dedicated to building intelligent, scalable, and impactful software solutions. Experienced in developing AI-powered applications, computer vision systems, and modern web platforms, with a strong commitment to innovation, continuous learning, leadership, and solving real-world challenges through technology.

EDUCATION

B. Tech in AIML	DKTE Society's Textile & Engineering	2023-2027
HSC 65.5%	DKTE Science Academy	2021-2023
SSC 80%	Mount Litera Zee School	2014-2021

SKILLS

Technical Skills:

- **Frontend:** React.js, TypeScript, JavaScript, HTML, CSS, Angular, Three.js
- **Backend:** Node.js, Express.js, Flask, Streamlit
- **Database:** MySQL, Firebase, Supabase, ChromaDB
- **AI/ML & GenAI:** Machine Learning, Computer Vision, OpenCV, Generative AI, LLM Integration, Prompt Engineering, RAG, Vector Search, NLP, AI Chatbot Development
- **Cloud & Tools:** AWS, Git, REST APIs, Web Scraping, Postman, Blender
- **Languages:** Python, Java, C, C++

Soft Skills: Problem Solving, Teamwork, Communication, Presentation.

EXPERIENCE

Full Stack Development Intern | Sysslan IT Solutions | May 2026 – Present

- Building scalable full-stack applications and integrating modern technologies to deliver efficient solutions.
- Collaborating on real-world projects, driving innovation from development to deployment.

Frontend Development Intern | CodeAlpha | May 2026 – May 2026

- Developed responsive web applications with reusable UI components and optimized user experiences.
- Applied modern frontend technologies to build high-performance, project-driven solutions.

Software Development Intern | Sunbeam Infotech | Dec 2025 – Jan 2026

- Built a full-stack Generative AI chatbot using Streamlit, ChromaDB, web scraping, and LLM integration.
- Improved expertise in prompt engineering, vector search, and end-to-end AI application development.

Freelance Developer | TextileGuru | Mar 2025 – April 2025

- Developed an e-learning platform for textile students with structured lessons and interactive learning modules.
- Improved platform performance and user engagement.

PROJECTS

- **ThreadCounty** : Built a machine learning model for accurate warp and weft thread counting using computer vision techniques. Integrated OpenCV-based image processing for automated textile inspection. SaaS and also an app for real-time analysis and user interaction. ([Live demo](#))
- **NotesPathv** : A structured digital notes platform that enables easy access to study materials and improves learning and revision. ([Live demo](#))
- **3D Portfolio Website** : Created with Three.js and ReactJS, showcasing interactive 3D designs and web development skills. ([Live demo](#))

EXTRA-CURRICULAR ACTIVITIES

- Participated in national-level paper presentations at TEXQUEST (ICT, Mumbai) and VASTRA (VJTI, Mumbai)
- Winner in Best Innovation, Shark Tank (MANEDGE 2026)
- Winner in Startx and 2nd Runner-Up in Paper Presentation at Textvision & Fashionova 2026

LEADERSHIP & CAMPUS AMBASSADOR

Google Student Ambassador | June 2026 – Present

- Represent Google on campus by organizing workshops, promoting AI and developer technologies, and mentoring students.

GeeksforGeeks Campus Mantri | June 2026 – Present

- Lead coding initiatives, organize DSA workshops and contests, and grow the campus developer community.

Technical Director - AISA | August 2026 – Present

- Lead website development, backend systems, and technical operations for the AI student association.
